Allowable Subject Matter

1. Claims 1-3 and 5-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious a substrate supporting apparatus as claimed in independent claim 1 wherein the combination of limitations includes a the limitations of the housing, rotatable chuck, cylindrical nozzle member, gas supply source, specifically the housing with a recess formed therein for a rotatable chuck and wherein the substrate is held over an upper surface of the chuck in a non-contact state by discharging gas from the nozzle hole and wherein in a state where an upper surface of the nozzle member is held lower than an upper surface of the chuck, a recess serving as a gas flow path is formed in an upper portion of the nozzle hole.

The closest prior art is as discussed in the previous office action.

Applicant's arguments were persuasive and the amendments to the claims overcome the prior art.

Furthermore, there is no prior art, either alone or in combination, that would render obvious the claimed invention, and no motivation found to modify the prior art to obtain the claimed invention. Furthermore, to modify the prior art to obtain the claimed invention would require hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
